

Connect with Comarch at the UBBA Summit & Plugfest 2024

Kansas City, USA, 05 Nov 2024 – 07 Nov 2024

We are excited to share that Comarch is a sponsor of the News Studio at UBBA Summit & Plugfest, which will take place at the Kansas City Convention Center in Missouri from November 5 to 7. Hosted by the Utility Broadband Alliance, the event promotes the development of private broadband networks for America's critical infrastructure industries.

UBBA Summit & Plugfest unites executives, innovation leaders, and utilities representatives from across North America. The conference provides the opportunity to experience the next generation of telecom solutions and technologies that advance digitalization for grid modernization needs. The upcoming edition of this event is expected to attract a record number of attendees. It will provide even more unique opportunities for technology vendors and service providers to engage with the utilities companies. The main topics that will be discussed during the event include AMI 2.0, Device Routing, and Edge Computing and Low Latency.

Our in-house expert, **Piotr Stoklosa, Director of Business Development at Comarch USA, will contribute to the conversation through an exclusive interview at the UBBA News Studio located in the Innovation Zone.** Piotr will share his insights into how digital twin solutions can facilitate telecom network management and enable AI use cases.

We also invite all attendees to visit Comarch booth #312 during the conference. Our team will be available to discuss Comarch's latest innovations and how they contribute to advancing utility broadband technology and infrastructure.

For further details about the event and to register, please visit the [UBBA Summit & Plugfest website](#).

If you have any inquiries or would like to arrange a meeting with our team, please contact Ashley Cronin, our Event Manager, at ashley.cronin@comarch.com.
